Ultra Logistics recognized as “Top 100 Logistics I.T. Provider for 2011”, 2nd year in a row

Fair Lawn, NJ, April 22, 2011

Ultra Logistics, a recognized third party logistics provider is pleased to announce its recent recognition as a “Top 100 Logistics I.T. Provider for 2011”, by Inbound Logistics magazine. Inbound Logistics editors selected Ultra Logistics in a pool of nearly 300 companies that submitted their credentials. Each April, Inbound Logistics editors recognize the top 100 logistics I.T. companies that provide best-in-class technology leading the way with logistics excellence through simplicity, fast ROI and efficiency.

“I’m excited about being named a Top 100 Logistics I.T. Provider for the second year in a row. This year we released a new version of UltraShipTMS™ that includes cutting edge features, and this award is a reflection of that. Our proprietary, web-based order optimizer has algorithms that are not used anywhere else in the industry and allow us to get savings on consolidation better than any of our competitors”, says Nicholas Carretta, President, Ultra Logistics. He further commented by saying “Additionally, we have new Carrier Assurance tools that help shippers stay in compliance with CSA 2010 monitoring rules. This is a big year for our software and I think this recognition as a Top 100 Logistics I.T. Provider reflects that.”

Ultra Logistics prides itself on its growth as a solutions provider, covering multiple modes of the supply chain process through a combined synergy approach. The company offers superior value through customized solutions, handling all your transportation needs including Truckload Transportation, Hosted Transportation Management Systems (TMS), Supply Chain Management, Network Optimization and Consulting. These unique and customized solutions have far surpassed the competition due to their competitive pricing, configurability and ease of use.
